vited to attend or become a member of the Y. M. C. A. I can speak only from the description of the rooms furnished by the pupers.

In your editorial of the 27th, inst., you attempt to describe what the Y. M. C. A. really is, saying, "It is not a church, neither is itsimilar to a church. In short, the association furnishes a sort of a club where ne limit is put on the membership etc."

If the above is true then the Y. M. C. A. must have radically and recently changed the qualifications necessary to membership.

The truth is, the Y. M. C. A. is both a church and a club, narrower in fits provisions of membership than either. Appleton's Encyclopedia Vol. 16, page 701 reads. "The pratical test is membership in some crangelical church, according to a rule adopted at Portland, 1869.

There are artive and associate members. An associate members has associate member has no vote or representation in the Y. M. C. A. A Universalist is not admitted to active membership, nor any other person not a member of the evangelical church. Some churches permit contributors an active participation in their business affairs, the Y. M. C. A. does not. The same with clubs. If the above statement is wrong will some member of the association please explain. Wishing the Y. M. C. A. a long and useful life and that thinght soon realize the narrowness of its policy, I am, sincerely George A. Sahlin.

works plant now in course of construc-tion.

The village board have received esti-nates on electric lighting and have learned that \$2,000 will build and equip an electric plant sufficient for lighting the stores, houses, churches and streets of the village. That is the appropria-tion to be voted upon and the bonds are to be sold not below par and to draw interest at 6 per cent. As the water works appropriation of \$10,000 was carried by a large majority there seems but little doubt but that the people will vote \$5,000 to give their village the appearance of a city and make it a delightful place for resi-dence.

OSSILI RECEPTION

The Literary Clubs of the Twin Cities Royally Entertained Yesterday,

The Ossili ladies gave a charming reception to the literary clubs of St. Joseph and Benton Harbor at the home of Mrs. R. M. Jones yesterday after-noon. As the guests arrived they were received at the door by Mrs. Sharpe, and after removing their wraps they were received by Mrs. Junes, Mrs. Reed and Mrs. Gilson. After a pleasant Reed and Mrs. Gilson. After a pleasant greeting they were ushered through smilax portiers into the dining room by Sessions and Mrs. Poole. Here they were served to coffee and sandwiches by Mrs. J. M. Albmeddinger, Mrs. George Dickiuson, Mrs. George Bell and Mrs. S. Barker. Miss Addie Graves and Miss Lydla Bulley presided at the dining table, filling the dainty cups with coffee.

HE TALKS ABOUT COERCION.

Mr. Baker Thinks There Was Som publican Gain Here.

On Thanksgiving day, Fred A. Baker, chairman of the democratic state committee, issued the following address:

To the men of Michigan who voted for the Bryan and Sewall electors: Gentlemen-Now that the vote in this state has been officially canvassed and Thanksgiving day is here, I desire to recall some of the extraordinary fearecall some of the extraordinary features of the recent campaign, to congratulate you on the rapid progress during the past year of the cause of free silver, and on the advance made by the friends of a purer, truer and The Catholic Fair Visited By Over better democracy, and to encourage you for the final struggle of 1900.

the campaign was the open and bare of the more heartless and inconsiderate security holders of the country. There were some notable and honorable exvere some meaning and monorating ex-ceptions, but as a rule it can be truth-fully said that the owners and man-agers of organized wealth made the most determined and desperate fight ever known in American politics, with he possible single exception of that nade by the slave-holders of the south

made by the slave-holders of the south in the campaigns immediately preceding the war of the rebellion.

That the intimidation to which I refor determined the result in this state is demonstratable by a brief examination of the returns. In 1892 the republican majority in the Upper Peninsula was only 2,018, but in 1896 it was interested to 17,413, showing that the mining corporations of Lake Superior were able to vote their men almost solid in favor of the single gold standard. In 1892 the rounty of Wayne gave a democratic majority of 1,219, which was changed to a republican majority in 1896 of 10,104. In that county the intimidation of all classes of voters was need systematic and thorough, and this was completed with a more builty distractions. A Long List of Them Joined the Patrician Relation of All Classes of voters was measured.

DUSTY BY ACTUAL COUNT." dentist Has Numbered the flust Par-ticles In the Very Purest Air.

It has always been believed that there could be no dust in the air of midecean or upon mountain peaks thousands of feet above the sea level where the snows are eternal. But science has re-cently demonstrated that such is not the ease. It has even gone further than linding dust in these places. It has counted, with the atmost accuracy, the number of particles in a cubic centi-

meter.
Dust mensurements were made from air over the open ocean and in moun-tain regions at allitudes from 6,300 feet to more than 13,000 feet. On the Bles-When the street car receivership of the Alpino chain, containing the case is decided I will move away that ,000 feet above the Zermatt valley or of Ziani on the west, the observations showed that at an elevation of 6,700 feet there were 950 dust partieles in a rubic centimeter, which measures a lit-tle over one-third of an inch. At 8,400 feet elevation only 513 dust particles were found, and at 18,600 feet above the sea the number diminished to 15 er cubic centimeter.

Over the Indian ocean the average number of dust particles in a cubic con-timeter was less than 500 for seven out of nine days, and on five days was less than 400. During a thick fog in the At-lantic the air was found to contain 3,120 dust particles per cubic continueter, The union silver party it appears has come to stay. GOV, "PING" RETURNS HOME.

Reform Whigh He Will probably inernment.

DETROIT, Nov. 28 .- Covernor Pingree has returned from an investigating tour of the eastern states. He has gained many of the them may be instituted in Michigan. In a talk with a reporter for the Detroit dournal he told of many things that he saw and heard which may influence his policy as chief executive of the state. Some

here is a comission, which regulates, the price of gas and electricity, and has somewhat to do with fixing street railway fares. Believes that such a commission could be appointed in Michigan and cause great nefit to the state. Heard everyone in the east express sur-

prise that railroads in Michigan paid no taxes upon real estate, though they receive water and fire and police protection. Beieves that the law exempting them is unconstitutional: that they ought to pay taxes us well as any one else; and that if one peron refused to pay his taxes on that ground and carried his case to court, his position would be sustained and the railroads would e forced to pay taxes on their real estate.

Believes that the claims of the railroads hat they cannot afford to give a 2-cent per nile fare is all bosh; that if such a fare is given in lieu of passes and distriminations n passenger rates, the passengers would make more money than now. Would like to know if salaries of railroad attorneys employed to fight such a condition had been owered in the past two or three years.

He heard about the proposed issuing in terchangeable 5,000-mile mileage books to ommercial travelerers, but doesn't believe the traveling men want them now, or that he people would buy from those w. o have them, as it is only a case of the railroads throwing a bone to the dog to keep him Heard that "through" railroad tickets

cost less per mile in Michigan than tickets cust people traveling in the state. Believes it about time for the people in the state to kick against paying for people in states either side of this who travel through the His honor heard and observed many mor

hings which it may please him to follow ut in Michigan.

The boy howled in dismay, and his nother dropped her bundles, imagining hat some one had walked on him

There was the balloon bobbing against the ceiling.

The boy held up his hands toward it and demanded that it he returned to

him. His mother gathered up her handles and scolded him for being careless. Then the siele became blocked with eople who offered suggestions.
"Get a long fishing pole," said one. "How did it happen?" asked another.
"How long will it stay up there?"
inquired yet another.
A porter came running to find out

what was the matter. A dozen willing people pointed out the balloon that rested lightly against the ceiling and was shifted about by every little movement

ANOINTMEN'T AT CORONATIONS.

Peculiarity of the Russian Ceremo Said to He Very Important.

It is not generally known that the rite of coronation in the Russo-Grook church agrees with the religious ceremony of an English coronation in one very im-portant particular or that this resem-blance distinguishes the coronation serv-

ices of England and Russia from those of all other countries.

The identity of ceremonial consists in the use of the "hely chrism," or "cream," in the anointment of the severeign. In the Roman rite, at the core mitions of the old emperors of Germany—that is to say, of the hely Roman empire, to which Austria, in a sense, has succeeded—not the schism, but the infarior oil of the catechangers, or caudidates for baptism, is employed. In the castern rite, on the contrary, the chrism is used.

is used.

This chrism is understood to bostow
"a charactor," to use a theological term,
upon the recipient—in other words, it
imparts certain gifts of the Hely Ghost
of the state of a scattered by the theological term, not exactly of a sacerdotal character, for it is not used in the east for the ordina tion of bishops or priests, but nevertheless a special gift from on high, which is indefensible in him who receives it, and which, so long as he corresponds with divine grace, gives him supernatural saramental grace to fulfil the duties of his high office.

This is the meaning of the words "the

scal of the gift of the Holy Ghost" used at the confirmation of a child in the east immediately after its baptism, and the same words are again used when the emperor is again anothred at his coronation. It is in the case of the empero alone that a man is ever anointed in the east more than once in his life. As al-ready stated, the chrism has never been used in the consecration of bishops, as

is in the greater part of the west.

Now it is a very interesting point to notice that the only country in the world desides. Russia in which at the present day the sovereign is anotated with chrism is England. This used also to be chrism is England. This used also to be the case in Franca, but of course the French monarchy is now a thing of the past. In a learned paper by Dr. Wide ham Legg a note is quoted from a pamphlet printed in 1419 upon the manner of crowning the emperor, in which it is stated that, whereas the kings of England, France and "Jerusalem and Cicilie" were thus another there were the supposition of the past of the supposition of the companion of the past of the supposition of the companion of the past of the supposition of the past o wildering number of sursuparillas and mervines that its success has brought it is stated that, whoreas the kings of England, France and "Jerusalem and Cicilio" were thus mointed, there were not fewer than 22 other kingdoms at that time in western Europe, including Poland, of which the sovereigns were not anothed. The kingdom of "Jerusalem and Cicilio" has of course long disappeared.—London Times.

Cut Flowers to New York.

There are now about 20 wholesale commission dealers in the divingment of the organs. There are now about 20 wholesale commission dealers in the flowers sold in this business started about 18 years ago. Before that early and florists who did not raise their own flowers sent to the greenhanses of the growers for them. New nearly all florists buy of the wholesale commission dealers in the city.

The flowers specially proposed in this city are grown in New Jersey, and on Long Island and as some other points in this state. They are hongsit here by express packed in boxes constructed for the purpose. The busy part of the day in the wholesale flower establishments is from 8 o'clock in the morning, at about which time the flowers arrive, antil about noon.

The customers of the wholesale denter include not only city florists, but also florists in many places within 75 miles.

#### A Chamberlain Story.

The remarkable youthfulness of Mr. The remarkable youthfulness of an Chamberlain's appearance has given rise to many stories. Here is one of them: In the days when he was a men-ber of Mr. Gladstone's administration the distinguished statesman had occasion to cross the Irish sea on a day when the boat was overprowded and there were no berths for all. He was attended by a private secretary with a board. The private secretary ploked acquaint The music of the popular Basque songs is in general plaintive and couched in the minor keys. The melodies, like the language, are a tradition—as no composers' names have come down to us—and this, again, is a singular compound of Spanish and oriental nelody. It also confirms my view of the origin of this interesting people, so that with a Scotchman, and the Scotchman made a suggestion for the distri-bution of the party on the principle of age before honors, "You and I, mon," he said. "will occupy the berths, and the wee laddie can just lie himself down on the floor."

: A physician who has just returned from a visit to Persia says that the Per-sians still believe that human tears are remedy:for certain chronic diseases At every funeral the bottling of mourn ers' tears is one of the chief features of the ceremonies. Each of the mourners is presented with a sponge with which to mop off his face and eyes, and after the burial they are presented to the priest, who squeezes the tears into bot-tles, which he keeps. This custom is one of the oldest known in the east and has probably been practiced by the Fersians for thousands of years. Mention is made of it in the Old Testament.

COLOR IN PLANTS The Host Important Coloring Substance
In the World is Chlorophyli,
Chlorophyll is perhaps the most important coloring substance in the world, for upon this substance depend the characteristic activity of plants, the synthesis of complex compounds from carbon dloxide and water process, upon which the existence of all living things is ultimately conditioned. Only in a very few unimportant forms devoid of chlorophyll can the synthesis of complex from simple compounds or from the elements be secomplished. The function of chlorophyll may only be comprehended when

phyll may only be comprehended when its chief physical properties are understood. Those may be best illustrated by placing a gram of chopped leaves of grass or geranium in a few cubic centimeters of strong alcehol for an hour.
